Key Financial Insights

Cables-led momentum: FY26 cables revenue grew strongly and became the principal growth engine.

Portfolio resilience: Diversified exposure across switchgear, lighting, consumer durables, cables and Lloyd.

Margin recovery: Base case assumes EBITDA margin improves from 9.9% in FY26 to 11.2% in FY31.

Cash generation: Operating cash flow funds capex, dividends and selective strategic investments.

Key sensitivity: Copper prices, competitive intensity, Lloyd demand and summer-season execution.

2. Strategic Model Insights

The growth, margin, cash and risk assumptions behind the Base case.

GROWTH DRIVERS	MARGIN DRIVERS	CASH DRIVERS	KEY RISKS
Infrastructure and electrification Cables, wires and industrial switchgear benefit from capex and construction demand.	Operating leverage Higher utilisation across plants and supply chain efficiencies support margins.	Strong operating cash flow Profitable growth and disciplined working capital fund reinvestment.	Commodity volatility Copper and aluminium movements can affect pricing and margins.
Premiumisation Smart, connected and design-led products increase wallet share and value mix.	Product mix Cables strength and Lloyd profitability can improve consolidated economics.	Capital allocation Capex, dividends and strategic investments are explicitly modelled.	Consumer demand Seasonality and discretionary spending affect ECD and Lloyd.
Distribution depth Extensive dealer, retail and digital channels support national reach.	Cost productivity Automation, localisation and manufacturing scale reduce unit costs.	Balance-sheet strength Low leverage provides flexibility for growth investments.	Competition Price-led competition in electricals and appliances may constrain margins.

Base-Case Interpretation

The forecast assumes continued strength in cables and industrial demand, a gradual improvement in Lloyd profitability, and stable margins in core electrical consumer categories.

Most important sensitivity: 100 bps of EBITDA margin changes FY31 operating profit by more than **Rs 350 Cr**.

Most important execution variable: sustaining volume growth while managing commodity pass-through and competitive pricing.

3. Forecast Assumptions

Base-case revenue, profitability, capex and capital-allocation drivers.

Cash Flow Insight

The model assumes that operating cash flow remains the principal funding source. Cables-led growth and margin recovery increase cash generation, while capex, dividends and strategic investments remain the main uses of cash.

SEGMENT	BASE-CASE VIEW	PRIMARY DRIVER
Cables	Fastest-growing core segment and largest contributor to incremental revenue.	Infrastructure, power, housing and industrial capex.
Switchgears	Stable compounder with premiumisation and distribution-led growth.	Construction, renovation and organised market share gains.
ECD	Moderate growth with margin support from product mix and efficiency.	Fans, water heaters and small appliances.
Lloyd	Recovery case driven by improved category demand and profitability.	Room AC growth, channel execution and manufacturing utilisation.
